Ashu Joshi

Full Stack Developer

joshiashu.hd@gmail.com **+91-6362835723** **Bengaluru, India**

Professional Summary

Highly accomplished and results-driven Full Stack Engineer with over 11+ years of experience in designing, developing, and deploying scalable enterprise-grade web and cloud applications. Proven expertise in front-end frameworks like React.js and Vue.js with state management (Redux, Pinia), and back-end technologies including .NET Core, ASP.NET. Adept at architecting microservices-based solutions, optimizing performance, and integrating with cloud platforms (Azure) using modern DevOps practices (Docker, Kubernetes, CI/CD). Strong collaborator with a track record of leading teams, driving innovation, and delivering user-focused, high-quality software aligned with business goals. Passionate about modern design principles, clean architecture, and continuous learning in emerging technologies.

Key Responsibilities

- Design, and delivery of full-stack enterprise systems using .NET Core, React, Vue.js, and Node.js.
- Defined and implemented microservices architecture, integrating distributed systems through RESTful APIs, gRPC, Kafka, and Service Bus.
- Designed scalable cloud-native solutions leveraging Azure aservices — including compute, storage, messaging, and deployment automation using Docker, Kubernetes, and CI/CD pipelines.
- Collaborated with stakeholders to translate business goals into technical roadmaps, design patterns, and reference architectures.
- Defined system integration strategies, ensuring high performance, reliability, and fault tolerance across modules.
- Created architecture documentation — including UML diagrams, deployment topologies, and sequence diagrams for team alignment.
- Championed clean architecture, SOLID principles, and design pattern adoption across teams.
- Conducted POCs and technology evaluations, recommending modern frameworks, libraries, and infrastructure optimizations.
- Collaborated closely with UI/UX teams to ensure consistent design implementation and seamless user experiences.
- Directed performance tuning, security enhancements, and system reliability improvements in production-grade environments.

Key Technical Skills

Languages	C#, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS
Frontend Architecture	React.js, Vue.js 3, Redux, Pinia, TypeScript, Tailwind, Bootstrap
Backend & API Architecture	.NET Core (6/7/8), ASP.NET MVC, ASP.NET Web API, Node.js, Entity Framework Core, Dapper, SignalR, RESTful APIs, GraphQL
Microservices & Integration	REST, gRPC, Kafka, RabbitMQ, Azure Service Bus, SignalR, WebSockets
Cloud & DevOps	Azure (App Services, DevOps, Functions), AWS (EC2, S3, Lambda, VPC), Docker, Kubernetes, Jenkins
Database & Storage	SQL Server, PostgreSQL, MongoDB, Redis, InfluxDB, OpenSearch
Architecture & Design Patterns	Clean Architecture, CQRS, Repository/Unit of Work, Singleton
Testing & Quality	Jest, Cypress, Vitest, NUnit, Postman
Version Control & CI/CD	Git, Azure DevOps, GitHub Actions, Jenkins, MSBuild, NuGet
Methodologies	Agile, Scrum, TDD, Domain-Driven Design (DDD), SOLID Principles

---

Professional Experience

Sr. Software Designer – Alstom Transport India Ltd.

🗓️ *Aug 2020 – Present | Bengaluru, India*
Project: RIGHT Suite (Railway Infrastructure Graphical Tool) & Tooling Platform

Key Contributions:

- Configured and managed production rollouts using Microsoft Azure Cloud, contributing to scalable deployment pipelines..
- Led full-stack development of a RailML-based infrastructure tool, improving page-load times by 30% through optimized server-side APIs.
- Architected and deployed microservices on Azure, establishing scalable CI/CD pipelines and automated rollouts.
- Integrated SSO with OIDC (PKCE) and Azure AD for secure enterprise authentication.
- Implemented AI-powered annotation feature using OpenAI API to auto-summarize engineer comments in the graphical tool.

Modules & Tech Stack:

- **RIGHT Viewer:** Node.js, React, Redis, XML, RailML, Azure

- **Tooling Platform (MX):** VueJS 3, GoJS, Ag-Grid, Bootstrap, Typescript, Micro-frontend
- **PBS-BoQ Tool:** .NET Core REST API, Angular, TypeScript, PostgreSQL, Azure
- **Profile Management:** .NET Core, React, PostgreSQL, Azure

---

Sr. Software Engineer – ParkingRhino Online Services

🗓️ *Mar 2018 – Aug 2020* | *Bengaluru, India*
Project: Smart Parking Management Solution (SPMS)

Highlights:

- Built the **entire solution from scratch**, including Web APIs and frontend using Angular.
- Designed **REST APIs** with repository pattern and **JWT-based authentication**.
- Enabled **real-time cloud-based parking management** with dashboards, navigation, and BI.
- Managed **AWS deployments** and server maintenance.

Tech Stack: C#, ASP.NET MVC, Web API, Angular, MySQL, SQLite, Entity Framework, AWS

Software Engineer – Advaitam Tech Solutions Pvt. Ltd.

🗓️ *Nov 2016 – Mar 2018* | *Bengaluru, India*
Project: Switch Analytics

Key Achievements:

- Implemented **Multi-Factor Authentication (MFA)** for secure access.
- Improved performance by **30%** through query and code optimization.
- Built reporting features for **VOIP call analytics** and dashboards.

Tech Stack: C#, ASP.NET MVC, WCF, MySQL, Entity Framework, AngularJS, Bootstrap

---

Software Developer – VadicVentures Learnings Pvt. Ltd.

🗓️ *Nov 2014 – Nov 2016* | *Bengaluru, India*
Project: TuPoints (Player & Test)

Key Contributions:

- Developed **web and desktop applications** for educational content and test management.
- Created **WinForm and Console apps** for offline use.
- Collaborated directly with clients for requirements and feature enhancements.

Tech Stack: C#, ASP.NET, WinForms, MySQL, Entity Framework, HTML, CSS, JavaScript, Bootstrap

---

Education

Bachelor of Technology – Computer Science & Engineering (2012)
BCET, Ludhiana – *Punjab Technical University, Jalandhar*

Achievements

🏅 Designated as **WCE Expert** for contributions to critical projects.
📜 Received **Appreciation Certificate** from Product Delivery Head & CTO.
🚀 Recognized for **100% successful go-live execution** of major deployments.

Areas of Interest

System Design • Frontend Architecture • AI-Driven UX • Cloud-Native Applications • Performance Optimization
